SUMMARY

Experienced Full-Stack & Web3 Developer with a strong background in building scalable web applications and decentralized platforms. Skilled in smart contract development on Ethereum and Polygon, with growing experience on Solana. Dedicated to writing clean, maintainable, and optimized code, and known for a deep understanding of blockchain integration to deliver secure, efficient, and user-centric products.

WORK EXPERIENCE

Senior Fullstack Web3 Developer, Imaginary Ones Pte. Ltd.   **Aug 2022 - Present**

- Developed and maintained Web3 applications, including NFT marketplaces, staking systems, and blockchain-based games.
- Designed and implemented smart contracts using Solidity, ensuring security, scalability, and efficient gas optimization.
- Designed, developed, and tested APIs across the Imaginary Ones ecosystem, integrating them to deliver reliable, high-performance user experiences.
- Collaborated with cross-functional teams to ensure smooth development and delivery of scalable, user-centered applications across multiple platforms.
- Contributed to the development of an AI-powered conversational platform, participating in end-to-end development efforts including performance optimization, security enhancements, and preparation for future technology integrations.

Backend Developer, PT. Duckie Multi Meta   **Dec 2021 - July 2022**

- Developed and optimized both backend systems and front-end interfaces, ensuring high performance, responsiveness, and reliability.
- Assisted in early smart contract development and Web3 integrations, contributing to the foundation of blockchain functionality within the platform.
- Collaborated closely with game developers to integrate APIs into in-game systems and fine-tuned implementations based on gameplay requirements.

Web Developer, PT. Graphie Global Interaktif   **Sep 2020 - Dec 2021**

- Designed, built, and maintained full-stack web applications for clients across industries such as e-commerce, healthcare, and media — including developing APIs and front-end interfaces to ensure seamless functionality and user experience.
- Collaborated directly with clients and internal teams to translate business requirements into functional and visually engaging digital solutions.

EDUCATION

Bachelor of Computer Science   **Aug 2016 - Aug 2020**

Sanata Dharma University, Yogyakarta
- Major in Informatics.
- Thesis on "Prediction of GPA and Study Period for New Student Candidates Using Neural Network Backpropagation" with GPA 3.46 out of 4.00

TECHNICAL SKILLS

- Vue, Nuxt, React, Tailwind, CSS, HTML, BOOTSTRAP, SCSS, GSAP, Three.js, JavaScript, TypeScript, PHP, Solidity, MySQL, PostgresSQL, Node.js, Nest, Express, CodeIgniter, Firebase, Supabase, Hardhat, Web3.js, Ethers.js, Viem, Remix, Git, Github, Bitbucket, AI-powered App, LayerZero, Jest, Mocha, Ganache
